# Main Functionalities

①

## MULTILINGUAL

Break your business boundaries with the multilingual bot: Weaver can understand and process nearly all world languages.

②

## VOICE

Weaver as an advanced AI assistant makes conversation with the chatbot even more natural by introducing complete voice communication.

③

## POWERFUL CHATBOT ENGINE

Enables the smooth flow of the conversation, combining the AI module, context switching, filling, and sharing, end-users are able to converse with companies just like they would with any other person.

4

### AI, NLP, NLU

Built on industry-leading Conversational AI technology and expertise with the powerful and unique bot engine Weaver is capable of leading natural Conversations with Voice or Text and providing human-level engagement and support.

5

### OMNICHANNEL

Provides the same conversational experience across all communication channels, as well as cross-channel continuity which allows end-users to initiate a conversation on one channel and seamlessly continue the interaction over the other.

# Why Weaver

- ✓ **Ease of story creation**
